

GET READY FOR GREAT

Your new home is equipped for the ultimate nbn[®] experience.
Enjoy the benefits of nbn full fibre, offering fast broadband
with reliability at its core.*

YOUR HOME, YOUR FUTURE.

built with **nbn** 

Steps to connect to the nbn network:

- 1. Select a speed:** With nbn full fibre, you can access a wide range of residential high-speed options, with a variety of nbn speeds for different needs.*
- 2. Contact a provider:** Ask to connect to a plan that uses your preferred speed over nbn Fibre to the Premises (FTTP). They should have a range of speeds and plan options for you to choose from, including ones that may offer no lock-in contracts. Scan the QR code below.#
- 3. Connect:** Speak to your provider about any equipment you require. Be sure to ask them about additional costs, minimum periods, and if any Wi-Fi modems or routers you may already have will support the latest technology.

Scan the QR code or visit nbn.com.au/FindProvidersToday to check your address and view providers you can contact to get connected.

Your company logo goes here.

Ensure pink box and text is removed prior to inserting your logo.

* nbn provides wholesale services to internet providers. Your experience, including the speeds actually achieved, depends on the configuration over which services are delivered to your premises, whether you are using the internet during the busy periods, and some factors outside of nbn's control (like your equipment quality and set-up, chosen broadband plan, age of device(s) and/or how your provider designs its network). # Not all providers offer plans based on the full range of nbn® wholesale speed tiers. Talk to your preferred provider for more information about availability and the right retail solution for your needs.
