

National Broadband Network – Rollout Information

The data contained in this document reflects NBN Co's position for the week ending 02 August 2018

Weekly Summary

This weekly report by NBN Co of network rollout progress reflects the Government's requirements for greater transparency as set out in the Statement of Expectations to NBN Co. This shows rollout progress as of last Thursday 02 August 2018

A total of 33,061 additional lots/premises were passed/covered by the network during the week. This included an increase of 27,506 in Brownfield areas, an increase of 2,726 in New Development areas and an increase of 2,829 premises in fixed wireless and satellite areas.

During the week an additional 27,749 premises had services activated on the network, including 26,382 more on fixed line services and 1,367 more using satellite and fixed wireless technologies.

RFS area: A Rollout Region is ready for service (RFS) when the majority of premises are passed by the nbn™ network and RSPs are able to begin selling nbn™ services in that Rollout Region.

Ready to connect: When a premises within an area declared RFS is made serviceable, and an order can be placed, and a service connected.

Not yet ready to connect: When a premises within an area declared RFS cannot currently order a service until further work is completed. For example, this could be because there is additional cabling required for an apartment block. This includes SC0 (FTTP), SC10 (FTTN/B), SC20 (HFC) and SC30 (FTTC).

Premises activated: Refers to premises which have an active service installed.

Variations in number from week to week reflect the modular construction program. The construction program is completed in blocks, so variations may occur. Following completion of the construction process passing premises in the streets, further validation of address data is undertaken of the 'as built' network against estimates obtained from national address data. There may be some fluctuation in numbers from week to week as a result.
