

National Broadband Network – Rollout Information

The data contained in this document reflects NBN Co's position for the week ending 24 November 2016

Weekly Summary

This weekly report by NBN Co of network rollout progress reflects the Government's requirements for greater transparency as set out in the Statement of Expectations to NBN Co. This shows rollout progress as of last Thursday 24 November 2016.

A total of 41,985 additional lots/premises were passed/covered by the network during the week, of which 37,555 were in Brownfield and 1,907 were in New Development areas. Fixed wireless coverage increased by 2,286 premises. nbn's long term satellite network was launched effective week ending 28th April 2016.

During the week an additional 23,377 premises had services activated on the network, including 20,613 on fixed line services and 2,764 using satellite and fixed wireless technologies.

¹ Excluding Service Class 0 (SC0) or equivalent

² Including Service Class 0 or equivalent. Effective week ending 28 April 2016, includes nbn's long term satellite service

Premises Declared RFS* refers to homes and businesses passed by the active network and ready for service, including premises activated and those which can't yet access a service (i.e Service Class Zero or equivalent). NBN Co releases premises to our Retail Service Providers subject to premises passed and serviceability criteria. Includes FTTP, FTTN/B, HFC.

Lots/Premises passed are included in the New Developments ready for service measure because the network in New Development areas often passes empty lots where premises are yet to be built.

Premises covered refers to fixed wireless and satellite areas ready for service, where no physical infrastructure passes the premises, but residents and businesses have coverage and can access a service via their preferred retail service provider. Effective Week ending 28 April 2016, includes premises covered by nbn's long term satellite service

Lots/Premises RFS is the combined total for fixed-line technology in Brownfields and New Developments plus, fixed wireless and satellite premises which are covered by the network, including Service Class 0 (or equivalent)

Premises activated refers to homes and businesses which have an active service installed.

Service Class Zero (SC0) or equivalent refers to premises passed by the active network, but for which a service cannot currently be ordered from a retail service provider because additional work is required, for example because there is cabling required for an apartment block. Includes SC0 (FTTP), SC10 (FTTN/B), SC20 (HFC).

Variations in number from week to week reflect the modular construction program. The construction program is completed in blocks, so variations may occur. Following completion of the construction process passing premises in the streets, further validation of address data is under taken of the 'as built' network against estimates obtained from national address data. There may be some fluctuation in numbers from week to week as a result.
